

Health Statistics and Resources for Kansas

This list is a compilation of sources for statistical information and resources to support community health assessment and health improvement planning. The Kansas Department of Health and Environment (KDHE) Bureau of Epidemiology and Public Health Informatics (BEPHI) compiled this document as part of the Kansas Partnership for the Improvement of Community Health (KanPICH). Many sites have information by county. A few of the sites aggregate data by Kansas Health Preparedness Region. This resource compilation has five parts:

- [Online Statistics and Query Tools](#) is a list of sites at which users can query data or select statistics for the state or county.
- [Mapping Resources](#) is a list of sites that contain information that can be displayed on a map. Most sites can provide county level maps.
- [Health Indicators Warehouse](#) is a comprehensive national site providing indicators for states and counties.
- [Static Reports and Publications](#) is a section that lists statistical reports and information, usually in PDF format.
- [The Resources section](#) is a list of materials that can help communities involved in community health assessment and health improvement planning.

KDHE, BEPHI, and KanPICH make no warranty about the statistics and information available at these links. The listing of sources is in no particular order. Inclusion on the list is not an implied endorsement of any of other statistics and resource providers. This information is compiled in the spirit of sharing important resources that can be used in community health needs assessment and community health improvement planning for Kansas health departments, hospitals, and community organizations. Most resources are free to the user. Some may require registration. Links are subject to change. If you find broken links or have suggestions, please email Kansas.Health.Statistics@kdheks.gov.

Online Statistics and Query Tools

These are websites in which the user can create custom tabulations, query specific data, or download actual data. User skills needed range from easy, moderate, to complex.

Resources for Mapping Census Data	http://www.census.gov/geo/reference/outside_sources.html	Census Bureau resource available for finding maps and mapping tools that are produced outside of the Census Bureau. The list of websites contains map viewers, shape files and other tools to aid data users utilizing their own mapping software. (USCB)
Community Health Needs Assessment.org	http://www.chna.org/Home.aspx	CHNA.org is a data and mapping tool. Information, much of it at county or lower geographic levels can be mapped or used in a report. (Advancing the Movement and IP3)
Community Issues Management (CIM)	http://www.cim-network.org/	Maintained by the University of Missouri, CIM maintains a wealth of federal statistics about Kansas counties. Free registration enables access to information. (MU)
NEW Kansas Data Archive Portal Map Tool	http://www.ipsr.ku.edu/ksdata/ksah/portal.shtml	The University of Kansas Institute for Policy and Social Research (IPSR) maintains the Kansas Data Archive Portal. This portal will allow users to explore the data in the Kansas Data Archive. Menus and links below will let you switch from map, trend graph (link in each county popup on map), and table of data. You can select other years, metrics, or browse more data. (KU-IPSR)

Health Indicators Warehouse

The U.S. Department of Health and Human Services, through the National Center for Health Statistics (NCHS), has created a warehouse of statistics on health indicators. When not suppressed for confidentiality or statistical reliability, these statistics are available at state and county levels. Whether county data are available depends on the dataset and suppression rules used by the provider of the statistics.
