

MOST AT-RISK ZIP CODES BY KEY CHILD INDICATORS (2012)

Introduction: Children’s Services Council and other organizations use key data and information to plan and target programs and services to communities based on the greatest need. For example, our Bridges Programs are located in at-risk communities so we can target our programs and services to families, pregnant women and young children. We originally compiled this information as part of a broader Palm Beach County Zip Code Report in 2010 and have continued to update and refine the information on the table. We hope the table will be useful to others in their planning and assist the community in joint efforts to coordinate programs and services.

A checkmark indicates that the Zip Code is among the 10 most at-risk Zip Codes for that particular child indicator. Only those Zip Codes with two or more indicators checked are included on the chart. The chart is further organized by color according to the following legend:

Legend:

2-4 Checks

5-7 Checks

8+ Checks

* The checkmarks for child care waiting list and juvenile arrests are the highest count rather than a percent or a rate.

¹ % of Teen births from all births within the zip code

² Graduation Rate based on the zip code of the student residence

³ Juvenile Arrests booked into the Juvenile Assessment Center
